Connected Educator Reading Course Listing

Connected Educator Reading:

This online product provides six courses in scientifically-based reading instruction methods. All courses are aligned with the National Reading Panel's recommendations regarding the fundamental components of reading instruction that lead to increased student achievement.

Course titles:

- **Phonemic Awareness and Beginning Phonics: Grades K, 1**
Phonemic Awareness and Beginning Phonics covers the teaching of phonics and phonemic awareness in kindergarten. Part 1 focuses on the research behind current instructional models. Parts 2 and 3 focus on how to turn research into sound classroom practice. Part 4 addresses assessment and intervention.
- **Building Basic Phonics Skills: Grades 1, 2**
Building Basic Phonics Skills covers the teaching of phonics and decoding in first grade. This course has four parts. Part 1 focuses on the research behind current instructional models. Parts 2 and 3 focus on how to turn research into sound classroom practice. Part 4 addresses assessment and intervention.
- **Introducing Text Comprehension: Grades 2, 3**
In this course, you'll learn about comprehension strategies your students can use to solve problems independently and build a deeper understanding of texts. You'll also learn how to support your students as they practice using these strategies.
- **Expanding Text Comprehension: Grades 4, 5, 6, +**
This course identifies eight comprehension strategies, or procedures, that a classroom teacher can use to enhance students' reading comprehension. Each session includes interactive activities that can be used to practice the strategies and a video in which a master teacher demonstrates a strategy.
- **Phonics Intervention: Grades 4, 5, 6, +**
Phonics Intervention covers the teaching of phonics for struggling readers in grades 4 and up. This course has four parts. Part 1 focuses on the research behind current instructional models. Part 2 examines diagnosis and classroom intervention strategies. Part 3 covers teaching phonics to older students. Part 4 addresses vocabulary and comprehension as well as how to address phonics in the different subject areas.
- **Building Fluency: Grades 1, 2, 3**
Learn how to improve your students' fluency in this interactive course. Designed to help you implement research-based practices in your classroom, this course covers the key components of fluent reading—speed, accuracy, and expression—and strategies that are proven to promote fluency. You'll learn about effective repeated reading practices, activities that build automaticity, assessment procedures that will help you monitor your students' progress, and more.
